FireLocator 2.5.0 Release Notes (Beta 1.5)

(Firelocator.net)

Sherif Ahmed
2/27/2009

FireLocator 2.5.0 is now available at
<http://firelocator.net> (US) and
<http://firelocator.net/aus> (Australia)

Integrated US & Australian Version

- The US and Australian Versions can be accessed via either of the entry points

RSS Feed

- Stay connected with Release Notes, News and feature updates via the FireLocator RSS feed

Other Usability Enhancements

- Sentinel & CFA callouts are now activated when the mouse is moved over the fire icons (instead of a click)
- All the fire information callouts now share the same look & feel
